"The frost was on the pumpkin" this morning, and it was not necessary to look twice to discern it. Observer Shilling terms it a killing frost—the temperature dropping sufficiently low to form ice. This killing frost is about a week later than customary. The bulk of the corn will not be injured. There will be soft corn aplenty, but this year such would prove true had the frost delayed its appearance ten days longer.

Foot Ball Friday

The initial game of foot ball will be played on the local field Friday afternoon with Cozad as the opposing team. This team defeated the Kearney Normalites in a fast game Saturday and it is predicted that the local team will be called upon to do its best. However, the North Platte team is pronounced one of the best the school has ever had, and it is promised that they will put up a strong game.

Even though you may not be very strongly interested in foot ball you can well afford to attend in order to encourage the local team and thus start the boys off with enthusiasm. The ginger displayed by a team is often gauged by the attendance at the game—and the "rooting." Therefore attend and "root."

Statistics on Murder.
In his book, "Pay Day," page 109, C. Hanford Henderson tells us on the authority of Andrew D. White that, for every million inhabitants, Canada has each year three murders; Germany, under five; Great Britain, ten; France, fourteen, and Belgium sixteen. These records are distressing enough, but they fall into insignificance before our own record. In the United States of America, Mr. White says, we have 129 murders per million inhabitants every year. In one single year over eleven thousand men and women and children are murdered. One murderer in seventy-five pays the death penalty, and for the rest an average imprisonment of seven years settles the score.—Henry B. Joy in Leslie's.

The aid society of the Christian church will meet Thursday afternoon in the church basement.
